Across the plaza: The public voids of the post-soviet city

AUTHOR(S): Owen Hatherley

EBOOKS

2/20/17

Edge City: Driving the Periphery of Sao-Paulo

AUTHOR(S): Justin McGuirk

February 28, 2017

The Arts Library is pleased to announce a trial through April 30 of [LibraryStack.org](https://web.library.yale.edu) [1]. Library Stack is a growing database of born-digital books, audio, videos, apps, and documents related to contemporary art and design, with intersections into cultural criticism, media studies, architecture and philosophy. Discovery of contemporary art resources, even those available on the open web, can be a challenge, and Library Stack seeks to collocate them, archive them, and make them searchable through additional metadata and an engaging interface. For some items, only a citation or link is available, while others offer a full download. Please [contact Library Stack](#) [2] with feedback on the new platform.
