Appendix I: Sample Training

Manuscripts and Archives has developed MARC training slides specific to its cataloging practices. These slides address only collection-level records and are intended to serve as a guide for creating catalog records in Voyager for already-existing descriptive content. Other cataloging units may wish to repurpose or adapt these slides for their own training purposes.

The MSSA MARC training slides are available here: [MSSA MARC Training](#) [1] (last updated July 2018)
