EXAMPLE 7. 2006340563. Indonesia is in an "Other regions or countries A-Z" section and is assigned only a Cutter number. Production-level cataloging; core level would probably have an added entry for the leader. Under AACR2 & the LCRIs, there were complicated reasons for not recording the performers in the statement of responsibility and for entering under title. Under RDA, assuming that the performers are not considered composers, entry under title is straightforward. Also under RDA, even if the performers did not appear on the disc label, they

would be transcribed without brackets in the statement of responsibility as long as they appeared on the container issued with the disc.

Although this document does not generally recommend use of 382 at this time, it might be helpful to bring out non-Western instruments for international collections if the instruments were listed in LCMPT in the absence of genre/form terms for music that are still in development. There are more specific types of gamelan, e.g. gamelan degung, gamelan gong gede, etc., but it may not be clear from the resource which is which. Unless you are an expert in that type of music, assign the more general term. The indicators are always 01, and the source for the term is in ‡2.
