Personal Search Preferences

Editing personal preferences allows you to define your preferred search and display settings. Once configured, these settings will be in effect whenever you log in to Orbis.

After logging in to [My Account](#) [1], select the tab **Edit Preferences**.

- Search options: Select a type of search and specify defaults for the selected search.
- Display options: Select the desired number of records to display, per page, from the drop-down box.

When finished, click the **Save** button.
