

New Features & Bug Fixes

Selected new features and bug fixes that affect the patron experience will be added here. More information may be found on relevant pages. For a complete list of recent work on Quicksearch, see the [Release Notes in SharePoint](#) [1].

[List of open issues](#) [2]

November 14, 2025:

- All Hathi record links now display. The links display in both search results and in the Item View.
- All E-book, E-journal, and E-Video links now display in the Item View.
 - Some work remains to be completed for the results list

November 12, 2025:

- Chinese, Japanese, and Korean subtitles in those character sets are now showing in search results lists, with Subtitle as the field label.
- Digital collections links for multiple volumes in a title are now condensed into a single link to all of the related images in DCS
- Enhanced Mobile layouts for Patron Dashboard added, moving the renewal check box to the left of the title. Click on a heading to re-sort the list of titles.
- Archival object-level records have been removed from Catalog Advanced search so results are more tightly focused.
- Bug fix for Law holdings with multiple item records that have a status of 'some available'. If some items are checked out, the remaining items are still available for requesting in the request menu.

October 15, 2025:

- Catalog searches have been updated to now use a default 'and' operator for the first 6 terms, increasing the accuracy of known title searching for experienced searchers. Catalog searches with more than 2 terms will also generate fewer search results, making it easier for novice users to browse through matching titles.
- Bug fixed for facet 'More' box pagination, which sometimes caused an error when navigating to page 2 of results.

October 8, 2025:

- Quicksearch All Results page displays for for Journal & Magazine Articles, Dissertations & Theses, and Newspaper Articles now include results from Primo 'full text.' As a result, the number of results in each of these blocks will match the number of results in Primo VE.
- Holdings level Provenance notes were removed from the Item View Details section and added to Holdings section where appropriate.
