

Retrospective Conversion

Card Catalog Location Guide (Last revision: 4 April 2007)

Sterling Memorial Library (SML) and Mudd

Two classification systems are used to arrange books in the SML stacks: Old Yale classification and Library of Congress (LC) classification. Most LC call numbers can be so identified by the presence of the designation "(LC)" as the last element of the call number. The exceptions are (1) D, PA-PZ, and Q, which are LC call numbers in which "(LC)" does not appear as the last element of the call number and (2) Near East, which appears as a stamp above an LC call number in which the designation "(LC)" does not appear as the last element of the call number.

Material with an Old Yale call number in one of the following classes (A B C F G H I J K) is shelved in the SML stacks; material with an Old Yale call number in one of the following classes (E L M N O P R S T U V W) is shelved in Mudd.

Creating ORBIS records for Official Card Boxes for LSF Transfer

Creating ORBIS records

In order to move completed Official Catalog Boxes to LSF, nineteen ORBIS records will be created to keep track of the 9060 boxes of the Official Catalog cards. For the efficiency of this process, each record will describe a maximum of 500 boxes at the bibliographic, holding and item levels.

Bibliographic Record:

- Create a new bibliographic record by deriving from the template record:

- Leaders

Bibliographic level: m monograph/item

Encoding level: 7 minimal level

008 Fields

Date: 2002

Place of publication: ctu

Language: eng

110:2 : \$a Yale University \$b Library

245:10: \$a Official Catalog boxes ...through... \$p From ...

260: : \$a New Haven, CT \$b Yale University Library, \$c 2002

300: : \$a 500 boxes

500: : \$a The heading on the first card in the first of the 500 boxes is recorded in the 245 subfield p.

- Record box numbers in five digits; add leading zeros if a number is shorter than five digits
- Record the main entry of the first card within the 500 boxes in 245 subfield \$p. Begin \$p with the word "From."

Example

The screenshot shows the Voyager Cataloging interface. The title bar reads: "Voyager Cataloging - [Bib 4648523 : Official catalog boxes 00001 through 00500 From 1,3-dipolar cycloaddition chemistry.]". The menu bar includes: File, Edit, Record, Display, Options, Window, Help. The toolbar contains icons for New, Open, Save, Search, Headings, Titles, Save to DB, New Hldgs, Get Hldgs, New Items, Get Items, Hierarchy, and Help.

The MARC record is displayed in a table format:

Tag	I1	I2	Subfield Data
035			#9 FNJ6368YL
110	2		#a Yale University. #b Library.
245	1	0	#a Official catalog boxes 00001 through 00500 #p From 1,3-dipolar cycloaddition chemistry.
260			#a New Haven, CT: #b Yale University Library, #c 2000.
300			#a 500 boxes
500			#a The heading on the first card in the first of the 500 boxes is recorded in 245 subfield p.

Below the table, there is a large empty text area for additional notes or comments. The status bar at the bottom right shows the time as 3:18 PM.

Holdings Record:

- Create five MFHD records for the holdings, each representing 100 boxes:
- Use "81" for the 852 field indicators
- Use "lsf" for the location code in 852 subfield
- Record the beginning and ending numbers of every array of 100 boxes in the call number fields #h and #i

Example:

MFHD 1: 852 81 #b lsf #h Box 00001-#i Box 00100
 MFHD 2: 852 81 #b lsf #h Box 00101-#i Box 00200
 MFHD 3: 852 81 #b lsf #h Box 00201-#i Box 00300
 MFHD 4: 852 81 #b lsf #h Box 00301-#i Box 00400
 MFHD 5: 852 81 #b lsf #h Box 00401-#i Box 00500

Item Records:

- Create one item record for each box:
- Use the New Items button or the Record >> Create Items to create an item record
- Wand a new barcode in the Barcode field
- Input the main entry if the first card in the box of the ENUM field following the instructions in [How to Input Main Entry Headings on Item Records](#) [1]

- Record the individual box number in the SPINE field

Example

Voyager Cataloging - [Item 3687154 for holding 5040627]

File Edit Record Item Display Options Window Help

New Open Save Search Headings Titles Save to DB New Higgs Get Higgs New Items Get Items Hierarchy Help

Title: Official catalog boxes 00001 through 00500 From 1,3-dipolar cycloaddition chemistry.

Main Entry Headings on Item Records

How to Input Main Entry Headings on Item Records:

- Click the Search button to bring up a search window
- Search the main entry heading of the first card
- Display from the index window a bib record that contains this heading
- Copy the form of heading from the bib record
- Switch to the item record window and paste the heading into the ENUM field
- Truncate the heading if necessary
- Type in the heading following the normalization rules below if the heading is not found from the search

ORBIS Normalization Rules:

- Leading articles are deleted for main title entries
- All alphabetic characters are set to upper-case
- Diacritics and leading characters are deleted
- Apostrophes are deleted; all other punctuation characters are replaced by a space
- Delimiters and subfield codes are deleted
- The music symbol for "flat" is replaced by its spelled out version (FLAT)
- The music symbol for "sharp" is deleted

- Greek characters are carried as upper-case alphabetic characters
- Superscripts are replaced by asteriks
- Subscripts are carried as simple numbers
- Data inside the angle brackets is deleted if the first four characters following the left angle bracket are "i.e."
- Following completion of the above normalization if more than one space in a row exists, the extra space is deleted
- Diagraphs are carried as two upper-case alphabetic characters

Examples:

Leading Articles

The history and Adventures of Little Henry (original)

Official Card Catalog OCLC Skip List

OCLC will skip the following types of cards:

- guide cards
- cards for headings
- cards for references

Retrospective Conversion

Published on Yale University Library (<https://web.library.yale.edu>)

- cards representing added entries (author and title)
- RLIN-printed cards
- temporary slips
- cards for "in" analytics that do not provide (1) the title of the analytic (2) a description of the parent item and (3) an indication of the location of the analytic in the parent item
- cards representing material in one of the following languages: Chinese, Japanese, Korean, Persian, Arabic, Hebrew, and Yiddish. However, OCLC will process cards with non-Roman alphabet characters representing materials in all other languages, including Greek and Russian. OCLC will update matching WorldCat records only; OCLC will flag for the attention of Yale staff cards for which a matching record is not found.
- cards representing microforms in the following sets:
 - Early American Imprints (Microprint 7)
 - Early English Books (Film S2663 Film S618)
 - Early English Newspapers (Film S1460)
 - Furniture Library Collection (Film B1332)
 - History of Photography (Film B3817)
 - Russian History and Culture (Fiche S459)
 - Sahel (Fiche B1116)
 - Spanish Drama (Film B3922)
 - German Baroque Literature (Film B974)
 - Western Americana (Film B2553)
 - Wright American Fiction (Film B765 Film B838 Film B855)
- cards representing Yale dissertations (including microform copies)
- cards representing material in the following collections or locations:

Undocumented Locations

Official Card Catalog

Undocumented Locations

The following locations were encountered by OCLC staff in the Official Catalog and did not appear on either the SKIP list or the PROCESS list. Consequently, OCLC staff skipped and flagged cards with these locations. When CMT staff members encounter such flagged cards they should consult this document to determine the appropriate action to be taken.

Location/Call Number	Action to be taken by CMT staff	Background
	Uncat (any letter). E.g., B uncat 3187 or L uncat 434	Search for a record in Orbis. If a matching record is found, the card can be discarded. If no record is found, file the card in the "undocumented locations" box.
	BABB James T. Babb JTB	These are temporary cards, and most represent items already cataloged.
	Bonaparte Collection [No. 8845]	These represent books cataloged or to be cataloged for Beinecke Library.
	Connecticut and Historical MSS Room	File the card in the "undocumented locations" box.
		These cards probably represent books at Beinecke.
		Items represented by these cards appear to have been recataloged for SML Mss & Archives. Checking finding aids in Mss & Archives in the future should resolve any problems

Retrospective Conversion

Published on Yale University Library (<https://web.library.yale.edu>)

Connecticut Hall	Skip	This collection was dispersed.
Conservation Library	File the card in the "undocumented locations" box.	Conservation Library was an earlier name of the Forestry & Environmental Studies Library.
Documents Room Ref	File the card in the "undocumented locations" box.	Once part of the reference collection in SML, this collection was apparently moved to Government Documents in Mudd.
E (Physical geog.)	File the card in the "undocumented locations" box.	The books represented by these cards are probably at Mudd at the beginning of the Old Yale "E" range.
F Assy	File the card in the "undocumented locations" box.	
Hebrew [+12]	File the card in the "undocumented locations" box.	
Henry Taylor	Skip	These cards are purchase requests, purchase records, or accessions, and the books they represent have been cataloged for Beinecke.
Inst. Far East Lang.	File the card in the "undocumented locations" box.	The Institute ceased to exist in 1965, and its functions were split between two university departments, the Dept. of East Asian Languages and Far Eastern Publications. The books these cards represent, if they still exist, are probably housed with one of the departments. Yale University Library may have ceased to take responsibility for this collection at some point.
Institute of Human Relations Administr. OR Human Relations Area Files (HRAF)	Skip	Yale University Library appears to have no responsibility for the books represented by these cards. However, if the collection still exists, it is likely to be part of the Human Relations Area Files (HRAF), an independent research agency of Yale University started by the Institute. HRAF are all on microfiche in the microtext room.
