Preferred source of information (RDA 2.1.2.2-3 and 2.2)

Note: this page was created with music cataloging in mind.

(2.1.2.2) Choosing a source of information for resources issued as a single unit

<table>
<thead>
<tr>
<th>If the resource</th>
<th>Then choose a source of information that</th>
</tr>
</thead>
<tbody>
<tr>
<td>is issued as a single unit</td>
<td>identifies the resource as a whole</td>
</tr>
<tr>
<td>embodies multiple works</td>
<td>has a collective title</td>
</tr>
</tbody>
</table>

If the resource
no source of information identifying the resource
consider that source to identify the resource as a whole
but
one source has a title identifying a main or predominant work or content
no source of information identifying the resource
treat the sources of information identifying its individual contents as a whole
and
no source has a title identifying a main or predominant work or content

(2.1.2.3) Choosing a source of information for resources issued in more than one part

Choose one of the following, as appropriate, as the basis for identifying the resource as a whole:

<table>
<thead>
<tr>
<th>If the resource</th>
<th>Then choose a source of information that</th>
</tr>
</thead>
<tbody>
<tr>
<td>a: is issued as a set that is unnumbered or the numbering does not help to establish the order</td>
<td>identifies the whole</td>
</tr>
<tr>
<td>b: has sequentially numbered issues or parts</td>
<td>identifies the lowest number</td>
</tr>
<tr>
<td>c: has unnumbered issues or parts</td>
<td>identifies the issue or part with the earliest date of issue</td>
</tr>
</tbody>
</table>

(2.1.2.4) Choosing a source of information for resources issued in more than one part

Choose one of the following, as appropriate, as the basis for identifying the resource as a whole:

<table>
<thead>
<tr>
<th>If the resource</th>
<th>Then choose a source of information that</th>
</tr>
</thead>
<tbody>
<tr>
<td>a: is issued as a set that is unnumbered or the numbering does not help to establish the order</td>
<td>identifies the whole</td>
</tr>
<tr>
<td>b: has sequentially numbered issues or parts</td>
<td>identifies the lowest number</td>
</tr>
<tr>
<td>c: has unnumbered issues or parts</td>
<td>identifies the issue or part with the earliest date of issue</td>
</tr>
</tbody>
</table>
member in that does not help to establish an order.

If the resource does not have a title identifying a main or predominant content, then consider the source to identify the resource as a whole but one source has a title identifying a main or predominant content. Treat the sources identifying the individual parts as a collective source of information for the resource as a whole. If the resource has no source identifying the resource as a whole and all sources have titles identifying a main or predominant content, then consider the sources identifying the individual parts as a collective source of information for the resource as a whole.
Music instructions from *Best practices for music cataloging* [3]:

**Scores issued with parts:** Generally apply 2.1.2.3 a) and treat the score (along with a cover* or wrapper if present) as a source of information identifying the resource as a whole.

*Cover* is not defined in RDA; nor was it defined in AACR2. Richard Smiraglia described it in *Cataloging Sheet Music: Guidelines for Use with AACR2* as “a wrapper made of material different from that used throughout the rest of the publication. Covers may be made of vellum, paper, fabric, plastic, etc. A paper page is a wrapper if any of the following differ from the score itself: color, texture, thickness, or type. Covers may or may not feature elaborate lettering or illustrations. Despite the popular usage of this term among collectors, most sheet music does not have covers but rather decorative or illustrated title pages.” The term "wrapper" is also not defined in RDA.

*Best practices for music cataloging* [3] includes the following instruction on determining covers as a source of information:

- Use cataloger’s judgment in determining whether or not the resource has a cover.
- Generally consider a cover to be made of substantially different material (e.g., heavier or different colored paper) than the paper on which the music is printed.

**Sets of parts with no score:**

- Includes cover or wrapper: generally apply 2.1.2.3 a) and treat it as a source of information identifying the resource as a whole.
- No cover or wrapper: apply 2.1.2.3 d) and select one of the parts as the main part
  - Give preference to parts that would generally appear first in score order
- Include a note on the source of title

<table>
<thead>
<tr>
<th>Multi-part sound recordings: Parts are:</th>
<th>Title is:</th>
<th>Apply:</th>
</tr>
</thead>
<tbody>
<tr>
<td>numbered</td>
<td>repeated on each part</td>
<td>2.1.2.3 a): choose a source of information identifying the lowest numbered issue or part available; treat the individual parts as a collective source</td>
</tr>
<tr>
<td>not numbered</td>
<td>not repeated on each part</td>
<td>2.1.2.3 c): choose a source of information identifying the resource as a whole; treat the individual parts as a collective source</td>
</tr>
</tbody>
</table>

Books or scores issued with audio/video carriers:

- Treat the **book/score** as the source of information identifying the resource as a whole (2.1.2.3 c) and apply 2.2.2.2 when:
  - The audio/video carrier is affixed to the cover or endpapers of the book/score
- Treat the **audio/video** carrier as the source of information identifying the resource as a whole (2.1.2.3 d) and apply 2.2.2.3 or 2.2.2.4 when:
  - The book/score and audio/video carrier are housed in a single container, such as a box containing a CD jewel case and a book
  - The book/score is inserted into the container, such as a booklet in a jewel case
  - The book/score is the same size as the audio/video carrier

*(2.2.2.1) Choosing a preferred source of information: basic guidelines:*
Preferred source of information (RDA 2.1.2.2-3 and 2.2)
Published on Yale University Library (https://web.library.yale.edu)

° Treat the storage medium (e.g., paper, tape, etc.) and any housing (e.g., cassette) that is an integral part of the resource as a part of the resource itself.
° Treat accompanying material as part of the resource
° Treat a container such as a box in which a game or kit is issued as part of the resource itself.

(2.2.2.2) Preferred source of information for scores:
Resources consisting of one or more pages, leaves, sheets, or cards (or images of them). This includes books and scores and PDF and microform reproductions of them.

Preferred source of information is the title page. For resources lacking a title page, use the following sources, given in order of preference:

• ° cover
• ° caption
• ° masthead
• ° colophon
• ° another source on the resource
  ° » give preference to sources in which the information is formally presented

° a statement printed in a fixed position in each edition or issue of a newspaper, magazine, etc., giving the publication’s name, the names of the owner and staff, contact information, etc.

(2.2.3) What to do when there’s more than one preferred source of information
When there is more than one source that qualifies as the preferred source of information, use the first occurring of those sources except under these conditions:

The resource: Contains preferred sources of information in more than one language or script:
(2.2.3.1) apply:

- ° the source in the same or predominant language or script of the content of the resource
- ° the source in the translated language or script when the translation is the purpose of the resource
- ° the source in the original language or script on the content, when the original language or script is known
- ° the first occurring of the sources

(2.2.3.2) is a facsimile or reproduction of the original and it includes a preferred source for the both the facsimile or reproduction and the original:

Apply:

- ° the source bearing the later or latest date

(2.2.4) Preferred source of information for sound recordings: Other resources (not covered under 2.2.2.2)

Best practices for music cataloging [3]: This rule applies to all audio carriers.

Preferred source of information is either:

- ° label bearing a title that is permanently printed on or affixed to the resource
  ° » this excludes accompanying material or a contain
- ° or
- ° embedded metadata in textual form that contains a title, such as metadata embedded in a MP3 audio file
- ° another source on the resource
  ° » give preference to sources in which the information is formally presented

What to do when identifying information doesn’t appear on the resource
Use the source of information, in order of preference:

• ° accompanying material
• ° a container not issued as part of the resource
• ° published descriptions of the resource
- any other available source (e.g., a reference source)

When information supplied for any of the elements below is taken from a source outside the resource itself, indicate it in a note or enclose the information in square brackets:

- **title**: title proper, parallel title proper, other title information, parallel other title information
- **statement of responsibility**: statement of responsibility (and parallel statement of responsibility) relating to title proper
- **edition statement**: designation (and parallel designation) of edition or of a named revision of an edition; statement of responsibility (and parallel statement) relating to the edition or to a named revision of an edition
- **numbering of serials**: (see 2.2.4 for list)
- **production, publication, or distribution statements**: place (and parallel place) of production, publication, or distribution; name (and parallel) name of producer, publisher, or manufacturer; date of production, publication, or distribution
- **series statement**: title proper (and parallel title proper) of series and subseries; other title information (and parallel other title information) of series and subseries; statement of responsibility (and parallel statement) relating to series and subseries; numbering within series and subseries

**LC practice/PCC practice**: Use square brackets if information taken from a source outside a resource itself is supplied in any of the elements listed. However, apply the exception in this instruction if the resource is of a type that does not normally carry identifying information.
