Preferred source of information (RDA 2.1.2.2-3 and 2.2)

Note: this page was created with music cataloging in mind.

(2.1.2.2) Choosing a source of information for resources issued as a single unit

<table>
<thead>
<tr>
<th>If the resource</th>
<th>Then choose a source of information that</th>
</tr>
</thead>
<tbody>
<tr>
<td>is issued as a single unit</td>
<td>identifies the resource as a whole</td>
</tr>
<tr>
<td>embodies multiple works</td>
<td>has a collective title</td>
</tr>
</tbody>
</table>

If the resource no source of information identifying the resource as a whole

but

one source has a title identifying a main or predominant work or content

no source of information identifying the resource as a whole

and

no source has a title identifying a main or predominant work or content

(2.1.2.3) Choosing a source of information for resources issued in more than one part

Choose one of the following, as appropriate, as the basis for identifying the resource as a whole:

If the resource choose a source of information that

| a: is issued as a set that as a whole is unnumbered or the numbering does not help to establish an order |
| b: has sequentially numbered issues or parts |
| c: has unnumbered issues or parts or has numbered issues or parts with the earliest date of issue |

Preferred source of information (RDA 2.1.2.2-3 and 2.2)

membering that does not help to establish an order

If the resource has no source of information identifying the resource as a whole but one source has a title identifying a main or predominant work or content:

- Treat the sources identifying the individual parts as a collective source of information for the resource as a whole.
- If the identification of a resource with ordered parts is not based on the...
Music instructions from *Best practices for music cataloging* [3]:

**Scores issued with parts:** Generally apply 2.1.2.3 a) and treat the score (along with a cover or wrapper if present) as a source of information identifying the resource as a whole.

*Cover* is not defined in RDA; nor was it defined in AACR2. Richard Smiraglia described it in *Cataloging Sheet Music: Guidelines for Use with AACR2* as "a wrapper made of material different from that used throughout the rest of the publication. Covers may be made of vellum, paper, fabric, plastic, etc. A paper page is a wrapper if any of the following differ from the score itself: color, texture, thickness, or type. Covers may or may not feature elaborate lettering or illustrations. Despite the popular usage of this term among collectors, most sheet music does not have covers but rather decorative or illustrated title pages." The term "wrapper" is also not defined in RDA.

*Best practices for music cataloging* [3] includes the following instruction on determining covers as a source of information:

° Use cataloger’s judgment in determining whether or not the resource has a cover.
° Generally consider a cover to be made of substantially different material (e.g., heavier or different colored paper) than the paper on which the music is printed.

**Sets of parts with no score:**

° includes **cover** or wrapper: generally apply 2.1.2.3 a) and treat it as a source of information identifying the resource as a whole.
° no **cover** or wrapper: apply 2.1.2.3 d) and select one of the parts as the main part
   ° give preference to parts that would generally appear first in score order
° Include a note on the source of title

---

**Multi-part sound recordings:**

<table>
<thead>
<tr>
<th>Title is:</th>
<th>Apply:</th>
</tr>
</thead>
<tbody>
<tr>
<td>numbered repeated</td>
<td>2.1.2.3 a): choose a source of information identifying the lowest numbered issue or part available treat the individual parts as a collective source</td>
</tr>
<tr>
<td>not repeated on each part</td>
<td>2.1.2.3 c): choose a source of information identifying the resource as a whole treat the individual parts as a collective source</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>not numbered repeated on each part</th>
<th>Apply:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>2.1.2.3 a): choose a source of information identifying the lowest numbered issue or part available treat the individual parts as a collective source</td>
</tr>
</tbody>
</table>

---

**Books or scores issued with audio/video carriers:**

° treat the **book/score** as the source of information identifying the resource as a whole (2.1.2.3 c) and apply 2.2.2.2 when
   ° the audio/video carrier is affixed to the **cover** or endpapers of the book/score
° treat the **audio/video** carrier as the source of information identifying the resource as a whole (2.1.2.3 d) and apply 2.2.2.3 or 2.2.2.4 when:
   ° the book/score and audio/video carrier are housed in a single container, such as a box containing a CD jewel case and a book)
   ° the book/score is inserted into the container, such as a booklet in a jewel case)
   ° the book/score is the same size as the audio/video carrier

---

(2.2.2.1) **Choosing a preferred source of information: basic guidelines:**
° Treat the storage medium (e.g., paper, tape, etc.) and any housing (e.g., cassette) that is an integral part of the resource as a part of the resource itself.
° Treat accompanying material as part of the resource.
° Treat a container such as a box in which a game or kit is issued as part of the resource itself.

(2.2.2.2) Preferred source of information for scores:
Resources consisting of one or more pages, leaves, sheets, or cards (or images of them). This includes books and scores and PDF and microform reproductions of them.

Preferred source of information is the title page. For resources lacking a title page, use the following sources, given in order of preference:

- ° cover
- ° caption
- ° masthead
- ° colophon
- ° another source on the resource
  » give preference to sources in which the information is formally presented

° a statement printed in a fixed position in each edition or issue of a newspaper, magazine, etc., giving the publication's name, the names of the owner and staff, contact information, etc.

(2.2.3) What to do when there's more than one preferred source of information
When there is more than one source that qualifies as the preferred source of information, use the first occurring of those sources except under these conditions:

(2.2.3.1) The resource contains preferred sources of information in more than one language or script:
Apply
use as the preferred source of information, in order of preference:

- ° the source in the same or predominant language or script of the content of the resource
- ° the source in the translated language or script when the translation is the purpose of the resource
- ° the source in the original language or script on the content, when the original language or script is known
- ° the first occurring of the sources

(2.2.3.2) The resource contains preferred sources of information bearing different dates:
Apply
use as the preferred source of information, in order of preference:

- ° the source bearing the later or latest date
- ° the source bearing the earlier or earliest date

(2.2.3.3) The resource is a facsimile or reproduction of the original and it includes a preferred source for both the facsimile or reproduction and the original:
Apply
use the preferred source of information for the facsimile or reproduction

(2.2.4) What to do when identifying information doesn't appear on the resource
Use the source of information, in order of preference:

- ° accompanying material
- ° a container not issued as part of the resource
- ° published descriptions of the resource
When information supplied for any of the elements below is taken from a source outside the resource itself, indicate it in a note or enclose the information in square brackets:

- ° any other available source (e.g., a reference source)

**LC practice/PCC practice**: Use square brackets if information taken from a source outside a resource itself is supplied in any of the elements listed. However, apply the exception in this instruction if the resource is of a type that does not normally carry identifying information.
