

Relationship designators between works, expressions, manifestations, and items (RDA Appendix J)

[Music Cataloging at Yale](#) [1] ? [RDA](#) [2]

See definitions for [work](#) [3], [expression](#) [4], and [manifestation](#) [5].
This page does *not* cover relationships between items.

Note: this page was created with music cataloging in mind. Consult RDA Appendix J for a complete list of relationship designators.

See also PCC's [Training Manual for Applying Relationship Designators in Bibliographic Records](#) [6]
See also [Relationship designators between a resource and persons, families, and corporate bodies associated with the resource \(RDA Appendix I\)](#) [7]

Relationship designators for related:

[works](#) (J.2): [Derivative relationships](#) (J.2.2) | [Whole-part relationships](#) (J.2.4) | [Accompanying relationships](#) (J.2.5)
[expressions](#) (J.3): [Derivative relationships](#) (J.3.2) | [Whole-part relationships](#) (J.3.4) | [Accompanying relationships](#) (J.3.5)

[manifestations](#) (J.4): [Equivalent relationships](#) (J.4.2) | [Whole-part relationships](#) (J.4.4) | [Accompanying relationships](#) (J.4.5)

A relationship designator indicates the nature of the relationship between between works, expressions, manifestations, or items (e.g., related work, related item).

Relationship designators provide more specific information about the nature of the relationship (e.g., parody of, facsimile of).

(J.1) General guidelines on using relationship designators:

- ° Relationship designators provide more specific information about the nature of the relationship (e.g., parody of, facsimile of).
- ° If the relationship element is considered sufficient for the purposes of the agency creating the data, do not use a relationship designator to indicate the specific nature of the relationship.
- ° Use relationship designators at the level of specificity that is considered appropriate for the purposes of the agency creating the data.
- ° If none of the terms listed in Appendix J is appropriate or sufficiently specific, use another concise term to indicate the nature of the relationship.

[PCC guidelines](#) [8]:

- ° The use of relationship designators for resource-to-resource relationships is encouraged.
- ° Do so even if the field coding otherwise already expresses a relationship.
- ° It is recommended that PCC catalogers use relationship designators from the RDA appendices.
- ° Prefer a specific term to a general one if it is easily determined.
- ° If the nature of the relationship cannot be ascertained even at a general level, do not assign a relationship designator.
- ° Where multiple relationships exist, e.g., an abridged translation, provide separate access points, each with a single relationship designator in a single $\$i$ subfield.

LC-PCC PS for RDA J.1: LC practice: When MARC subfield $\$i$ for a relationship designator is used in a bibliographic record,

- ° give $\$i$ as the first subfield,
- ° capitalize the first word in the designator,
- ° end the subfield with a colon.
 - » Alternatively, identify one relationship as primary and record that relationship alone.
- ° Include a 7XX field with a relationship designator referring to a specific related resource even if a 130 or 240 field is already present implying that they are versions of the same work.
- ° If there is reason to believe that the resource being cataloged is related to another resource, but the resource in question cannot be identified (e.g., in the case of an expression that is believed to be a translation but the original

is unknown), give the information in a note.

° When constructing a reference to a related resource sharing the same principally responsible creator as the resource being described, use a 7XX author-title entry explicitly naming the creator in its \$a rather than a 740 title entry with an implied relationship to the 1XX in the same record.

(J.2.2) Derivative work relationships

based on (work)

A work used as the source for a derivative work.

Reciprocal relationship: derivative (work)

Music-related relationships under this category are:

adaptation of (work)

A work that has been modified for a purpose, use, or medium other than that for which it was originally intended.

Reciprocal relationship: adapted as (work)

Specific examples of "adaptation of (work)":

° **libretto based on (work)**

A work used as the basis for the text of an opera or other work for the musical stage, or an oratorio.

Reciprocal relationship: adapted as libretto (work)

° **motion picture adaptation of (work)**

A work that has been adapted as a motion picture.

Reciprocal relationship: adapted as motion picture (work)

° **musical theatre adaptation of (work)**

A work that has been adapted as a musical theatre work.

Reciprocal relationship: adapted as musical theatre (work)

° **opera adaptation of (work)**

A work that has been adapted as opera.

Reciprocal relationship: adapted as opera (work)

expanded version of (work)

A work used as the basis for a derivative work that enlarges upon the content of the source work

Reciprocal relationship: expanded as (work)

imitation of (work)

A work whose style or content is copied in a derivative work.

Reciprocal relationship: imitated as (work)

musical setting of (work)

A work that provides the text for a non-dramatic musical work, other than an oratorio.

Reciprocal relationship: set to music as (work)

paraphrase of (work)

A work used as the basis for a paraphrase, i.e., a restating of the content of the source work in a different form.

Reciprocal relationship: paraphrased as (work)

variations based on (work)

A musical work from which melodic, thematic, or harmonic material is taken to form a discrete theme, which is repeated

		one or more times with subsequent modifications. Reciprocal relationship: modified by variation as (work)
derivative (work)	A work that is a modification of a source work. Reciprocal relationship: based on (work)	
Music-related relationships under this category are:		
adapted as (work)		A work that modifies the source work for a purpose, use, or medium other than that for which it was originally intended. Reciprocal relationship: adaptation of (work)
Specific examples of "adapted as (work)":		
° adapted as libretto (work)		A work that consists of the text of an opera or other work for the musical stage, or an oratorio, based on the source work. Reciprocal relationship: libretto based on (work)
° adapted as motion picture (work)		A motion picture based on the source work. Reciprocal relationship: motion picture adaptation of (work)
° adapted as musical theatre (work)		A musical theatre work based on the source work. Reciprocal relationship: musical theatre adaptation of (work)
° adapted as opera (work)		An opera based on the source work. Reciprocal relationship: opera adaptation of (work)
expanded as (work)		A work that enlarges upon the content of the source work. Reciprocal relationship: expanded version of (work)
imitated as (work)		A work that copies the style or content of the source work. Reciprocal relationship: imitation of (work)
modified by variation as (work)		A musical work in which melodic, thematic, or harmonic material is taken from the source work to form a discrete theme, which is repeated one or more times with subsequent modifications. Reciprocal relationship: modified by variation as (work)
paraphrased as (work)		A work that restates the content of the source work in a different form. Reciprocal relationship: paraphrased as (work)
set to music as (work)		A non-dramatic musical work, other than an oratorio, that uses the text of the source work. Reciprocal relationship: musical setting of (work)

MARC subfield coding for relationship designators between works, expressions, manifestations, and items:

In bibliographic records and authority records:

‡i may contain either

° a designation of a relationship of the entity

OR

° a textual reference instruction phrase that is to be used for a user display indicating the relationship
