

Universal product code (UPC) and other codes (MARC 024)

[Music Cataloging at Yale](#) [1] ? [MARC tagging](#) [2]

The UPC code is a 12-digit number appearing underneath a barcode on commercial products in the US and Canada. The 1st and 12th digits are smaller and appear on either end of the barcode; the 2nd through 11th are divided into two groups of five underneath the barcode.

The UPC code is entered in the 024 field without any spaces.

first indicator = 1

second indicator = blank

The first 6 of these digits is the manufacturer's code.

The next 5 digits are the product code.

The last digit is a check digit.

Input all 12 digits in the 024 field, with 1st indicator "1":

024 1_ 028943083239

UPC code under a
barcode

Don't confuse a 13-digit International (formerly European) Article Number (EAN) with an UPC. The EAN, international standard corresponding to the UPC, looks very much like a UPC code, except for the extra digits.

Enter the EAN without hyphens or spaces in the 024 field, with 1st indicator "3":

024 3_ 4901234567894

EAN code under a
barcode

The ISWC (International standard musical work) code is an 11-digit number divided into three elements: the letter T (the prefix element), followed by nine digits (the work identifier), and a numeric check digit.

It appears with or without hyphens and/or dots:

ISWC T-034.524.680-1

ISWC T0413603765

Enter the ISWC code the 024 field without spaces, hyphens, or dots.

first indicator = 7

second indicator = blank

in ‡2 add iswc (in lower case):

024 7_ T0413603765 ‡2 iswc
