[Music Cataloging at Yale](#) [1] ? [MARC tagging](#) [2]

Note: this page was created with music cataloging in mind.

Use in conjunction with [Recording numeric designation for musical works](#) [3] (RDA 6.16) and [Best practices for music cataloging](#) [4].
In 2024, the field was renamed and the definition and scope was broadened to accommodate numeric designations of musical expressions. See [Interim Music Library Association Best Practices for Recording Numeric Designations of Musical Works and Expressions in Field 383 of the MARC Bibliographic and Authority Formats](#) [5].

[Indicators](#) | [Subfields](#) | [Examples](#)

In **bibliographic** and **authority** records: a serial number, opus number, or thematic index number assigned to a musical work by the composer, publisher, or a musicologist.

- ° May be used to differentiate a musical work from another with the same title.

Instructions for PCC catalogers in [Descriptive Cataloging Manual \(DCM\) Z1](#) [12], section on field 383:

- ° Best practice: Encode when available.
- ° Create separate 383 fields for different numbering schemes associated with a single work.

Indicators	
1st	0 = Work: Numeric designation associated with the work. 1 = Expression: Numeric designation associated with the expression
2nd	blank
Subfields	
⌘a	Serial number: a numeric designation of musical work that is assigned by a composer or a reference source that indicates a sequence of musical works that share the same title or that share the same title and the same representative medium of performance.
⌘b	Opus number: a numeric designation of musical work that is assigned from a list of works of a composer indicating the chronological order of composition. The thematic index numbers used in an authorized access point should come from a recognized thematic index, but you may record numbers not found in such a source in the 383 field.
⌘c	Thematic index number: a numeric designation of musical work that is assigned from a list of works of a composer, usually arranged in chronological order or by categories, with the theme given for each composition or for each section of large composition.
⌘d	Thematic index code: code identifying thematic index represented by the number recorded in subfield ⌘c. ° For codes, see Thematic Indexes Used in Library of Congress NACO Authority Files [13]
⌘e	Publisher associated with opus number: brief identification of publisher associated with number recorded in ⌘b. ° Use only when different publishers assign

» different opus numbers to the same work

or

» the same opus number to different works.

‡2 Source of term: MARC code that identifies the source of the term in subfield ‡a when it is from a controlled list.

° use ‡2 mlati for [Thematic Indexes Used in Library of Congress NACO Authority Files](#) [13].

Published on Yale University Library (<https://web.library.yale.edu>)

edition of one of those sources (Ryom):

The number in the current (2007) edition of Ryom is RV Anh. 103. In the current edition, there is a reference from an older form of numbering (RV 102), taken from the 1986 edition. Even though it is referenced in the current edition, it is considered to have been taken from the older edition. Because there is no [mlati](#) [13] code for the 1986 edition, there is no $\dagger 2$ code in the 383 field for the older form of number:

383 __ $\dagger c$ RV Anh. 103 $\dagger d$ **Ryom** $\dagger 2$ mlati

← The mlati code for the 2007 edition of Ryom

383 __ $\dagger c$ RV 102 $\dagger d$ **Ryom, 1986**

← The 1986 edition of Ryom doesn't have a mlati code

383 __ $\dagger c$ F. XII, 52 $\dagger d$ Fanna $\dagger 2$ mlati

← Numeric designation from another source (mlati code Fanna), to be used in variant access points for the work
