° May be used to differentiate a musical work from another with the same title.

‡a Serial number: a number used if works with the same title and the same medium of performance are consecutively numbered in music reference sources.

‡b Opus number: an identifying number of a musical composition sometimes followed by a number within the opus.
The thematic index numbers used in an authorized access point should come from a recognized thematic index, but you may record numbers not found in such a source in the 383 field.

‡c Thematic index number: a number assigned to a work in a recognized thematic index in the case of certain composers.

‡d Thematic index code: code identifying thematic index represented by the number recorded in subfield ‡c.
° For codes, see The Thematic Indexes Used in the Library of Congress/NACO Authority File [12]

‡e Publisher associated with opus number: brief identification of publisher associated with number recorded in ‡b.
° Use only when different publishers assign
  » different opus numbers to the same work
  or
  » the same opus number to different works.

‡2 Source of term: MARC code that identifies the source of the term in subfield ‡a when it is from a controlled list.
° Use ‡2 mlati for The Thematic Indexes Used in the Library of Congress/NACO Authority File [12].

383 __ ‡c K. 300c ‡d Köchel6 ‡2 mlati  The mlati code for the 1983 (6th) edition of Köchel

Numeric designations from current and older editions of the same source and from an alternate source:
Separate 383 fields for alternate numbers from different sources (Ryom and Fanna) and numbering from an older edition of one of those sources (Ryom):
The number in the current (2007) edition of Ryom is RV Anh. 103. In the current edition, there is a reference from an older form of numbering (RV 102), taken from the 1986 edition. Even though it is referenced in the current edition, it is considered to be taken from the older edition. Because there is no mlati [12] code for the 1986 edition, there is no ‡2 code in the 383 field for the older from of number:
383 __ ‡c RV Anh. 103 ‡d Ryom ‡2 mlati  The mlati code for the 2007 edition of Ryom
383 __ ‡c RV 102 ‡d Ryom, 1986  The 1986 edition of Ryom doesn't have a mlati code
383 __ ‡c F. XII, 52 ‡d Fanna ‡2 mlati  Numeric designation from another source (mlati code Fanna), to be used in variant access points for the work
