### A Handbook of Examples For Use in Authority Records Created By the NACO-Music Project

- **Citing main entry in the 670**
- **Standard ways of citing various reference and bibliographic sources**
- **Citing reference sources and databases**

### Preface

#### 670 field, ‡a

- Indicating location of information cited from the item being cataloged:
  - Books and scores | Sound recordings | Video recordings | Multi-volume items
- Citing information found in the reference source
- Citing information from bibliographic records:
  - names | title information | bracketed information in the bibliographic record

### Other:

- **Citing Internet resources:**
  - Citing a web site by name | URL
  - Citing a location within a web site
  - Citing information found in a web site
- **Capitalization of key, opus, and number**
- **Communications with people**
- **663 field**
- **Examples of 667 and 675 fields**
- **PVRs (Previously verified records)**
- **Modifying machine-derived authority records (MDARs)**
Preface

This handbook is a compilation of examples with explanations for creating citations for sources of information in the authority record. It does not encompass establishing the heading itself; only how to cite the sources in which information necessary to create the heading was found. The examples are not to be regarded as "rules." The fields that are affected are:

670: Source data found: includes information about the name or title represented in the 1XX field, including facts that contribute to the identification of the heading and that justify the choice of the form used as the 1XX heading and references to it.

667: Non-public general note: gives information of permanent value and general interest that is not necessarily taken from the item being cataloged.

675: Source data not found: lists consulted sources in which information about the 1XX heading might be expected to be found, but was not.

Generally, only the NAR number, 1XX field, and 670 field appropriate to the example are included, even if the authority record has cross references and multiple 670 fields. When needed to illustrate a point, cross references and multiple 670 fields are included.

This handbook was compiled in 1992, with the assistance of Jeffrey Earnest, and revised in 1994. Several people's contributions need to be acknowledged. Ralph Papakhian and Sue Stancu at Indiana University, Linda Barnhart at University of California, San Diego, Mark Scharff at Washington University in St. Louis, and Harry Price and the late Virginia Giffor at the Library of Congress, contributed and commented on the first and revised drafts. Jennifer Bowen and Laura Snyder at the Eastman School of Music, Sibley Music Library, provided examples for the first version. It was completely revised in 1998 and continues to be updated as needed.

The NACO Music Project's (NMP) goal is the cooperative contribution of music name and name/uniform title authority records to the LC Name Authority File as part of the national NACO project. All music headings should be contributed as part of the NACO Music Project. NMP is administered through a funnel configuration under the purview of the Music Library Association's Cataloging and Metadata Committee, coordinated by Mark Scharff, at Washington University in St. Louis. Utilizing e-mail, the NMP coordinator and independent NMP participants review the headings of new participants until they become independent. Those independent participants then review new participants' headings until they too become independent. Independent status is defined as having the authority to contribute name and/or name/uniform title authority records without review. A participant can become independent in stages, with names first, then name/uniform titles, or both at once. Although participation in NMP is granted to the combined individual and institution, independent status for an NMP participant is achieved through the NMP review and testing process, not through the status of the home institution.

NMP has established a number of ways of training and communicating with its members. First, this handbook provides instructions for formulating the 670 fields in the authority record. Second, NMP has a e-mail list used for various purposes: to ask general questions concerning establishing a heading or citing information in the authority record, to make announcements of interest to all NMP participants, and to announce new developments or revised documentation. Third, while still administered under the Music OCLC Users Group, during the annual MOUG meeting, which usually precedes the annual Music Library Association meeting, the NMP participants meet to discuss new developments and air concerns.

Currently, the project comprises more than 60 music libraries or collections in various stages of training, at university, college, conservatory, and public libraries. New libraries can be added in several different ways:

- Music catalogers at newly-trained NACO institutions ask to participate;
Citing main entry in the 670

When establishing headings for persons, corporate bodies, or name/title combinations, the first 670 field should represent the work being cataloged. If the item used to establish the heading is not a book, score, or serial, use an abbreviated general material designator in brackets before the date, e.g. [SR], [VR], [MI].

Main entry is the person or corporate body in the 1XX field:

For personal name headings, use the last name and initials (with no spaces) for forenames for the person considered the main entry for that work.

When the main entry is a forename with subfield c following it, include the information in subfield c in the 670 field:

For corporate name headings, give the heading abbreviated as much as possible within the limits of intelligibility when the corporate body is considered the main entry for that work:

nr9416247
110 2_ Boston Baroque Ensemble
670 0_ Boston Baroque Ensemble. Dinner music of the 1740's [SR] 1966: ‡b label (Boston Baroque Ensemble)

Main entry is not the person or corporate body in the 1XX field:

When the person or corporate body in the heading is not the main entry for the work being cited, use either person/body followed by a title or a title only. If the work is entered under a personal or corporate heading, give the heading abbreviated as much as possible within the limits of intelligibility. Use initials (with no spaces) for forenames of authors entered under surname.

Main entry is the composer:

Standard ways of citing various reference and bibliographic sources

These are some of the most commonly used references and one or two standard ways of citing them in 670 fields.

When a print source is arranged alphabetically, do not cite page number. When an entry appears in a location other than where it would be found alphabetically, cite volume and/or page number. When citing a location within a source, use a colon before the indication of location, e.g. [Title of source]: ‡b p. 35 [data]

When establishing name/title headings, check existing authority records for similar name/title headings for that composers. Often, LC uses a brief citation, such as "Schmieder, 2. Ausg." and using this abbreviated form can save time and keystrokes.

Citing reference sources and databases

When a print source is arranged alphabetically, do not cite page number. When an entry appears in a location other than where it would be found alphabetically, cite volume and/or page number.

There are two instances of prescribed punctuation. When citing a location within a source, use a colon before the indication of location (e.g.: New Grove: ‡b v. 16, p. 742). When citing headings found in bibliographic sources, specific punctuation is prescribed: [Source] ‡b (hdg.: [data])

This is a straight forward example of citing an encyclopedia in which the entries are arranged alphabetically:

nr9140037
100 1_ Lemlin, Lorenz, ‡d approximately 1495-1567 __ New Grove ‡b (Lemlin (Lemblin, Lemlein), Lorenz; b. ca. 1495, Eichstätt, d. after 1549)

Both the volume and page of New Grove are cited because the entry for Johann Ernst Bach is included in the article on the entire Bach family, not under Bach, Johann Ernst. The name is cited in direct rather than inverted order, as that is how it appears in the source:

no9140009
100 1_ Bach, Johann Ernst, ‡d 1722-1777 __ New Grove: ‡b v. 1, p. 863 (Johann Ernst Bach; b. Jan. 30, 1722, Eisenach; d. Sept. 1, 1777, Eisenach)

Another form that seems to be accepted is:

670 __ New Grove ‡b (under Bach: Johann Ernst Bach... )

In this citation also, the name is also cited in directed order.

This form of citation is also useful for citing information from articles not about the person or corporate body being established:

670 __ New Grove ‡b (under Chicago: Opera of Chicago... )

The volume and page of New Grove American are cited because the entry is under an entry for the entire family:

nr9145292
100 1_ Damrosch, Frank, ‡d 1859-1937 __ New Grove dict. of Amer. mus.: ‡b v. 1, p. 565 (Frank (Heino) Damrosch; b. June 22, 1859, Breslau, Germany (now Wroclaw, Poland), d. Oct. 22, 1937, New York; conductor and teacher; came to New York in 1871)

Indicate edition if other than the first:

no9012924
100 1_ Cassler, G. Winston ‡q (Glenn Winston), ‡d 1906-1990
nr9229805

100 1_ Bach, Johann Sebastian, ‡d 1685-1750. ‡t Wir Christenleut, ‡n BWV 710

no9014525

100 1_ Hellmesberger, Joseph, ‡d 1855-1907
670 __ MGG: ‡b v. 6, column 113 (Hellmesberger, Söhne Josephs: Joseph; b. Apr. 9, 1855, d. Apr. 26, 1907, Wien)

There are two parts to this source, so the Teil must be indicated:

nr9145304

100 1_ Rellstab, Johann Friedrich, ‡d 1759-1813

In this case, the page was also cited because the information was in an entry for the entire family:

nr924795

100 1_ Schubert, Carl, ‡d 1811-1863

When citing information from this set (Compositores de América), cite only the volume when the articles are in alphabetical order by composer in that volume. In some early volumes entries are not in alphabetical order, so for these, page numbers would also have to be given, as in the next example:

nr9135296

100 1_ Broque, Alfonso, ‡d 1876-1946. ‡t Cantos uruguayos
670 __ Compositores de América: ‡b v. 6 (Tres cantos uruguayos)

In volume three of this set, the composers are not given in alphabetical order, thus the page must be cited as well:

no883169

100 1_ Villa-Lobos, Heitor. ‡t Carnaval das criancas. ‡p Guizos do dominozinho
670 __ Compositores de América: ‡b v. 3, p. 24 (Carnaval das criancas brasileiras. 3, Os guizos do dominozinho)

This is cited from an LC card, as a bibliographic source rather than as a reference source. Usage is cited because it is different from the heading found in the source:

nr9212642

100 1_ Pickett, A. G. ‡q (Andrew G.)
670 __ LCCN 59-61290 ‡b (hdg.: Pickett, Andrew G.; usage: A.G. Pickett)

100 1_ Rickaby, Franz, ‡d 1889-1925
670 __ NUC pre-56 ‡b (hdg.: Rickaby, Franz Lee, d. 1925; usage: Franz Rickaby)

It could also have been cited as a reference source. In this case, however, the usage (without the middle name) could not have been indicated:

670 __ NUC pre-56 ‡b (Rickaby, Franz Lee, d. 1925)

The New York Public catalog cited as a bibliographic source rather than as a reference source. Also an example of multiple usage in one source:

nr9131821

670 __ NYPL. Dict. cat. of the mus. coll., 2nd ed. ‡b (hdg.: Lahoz, Florencio, 1815-1868; usage: F. Lahoz; Florencio Lahoz)

When citing the date of search in a database, cite the month, day, and year, in any form (e.g. March 6, 1992 or 6 March 1992) as long is cited in full:

nr9217472

100 1_ Falla, Manuel de, ‡d 1876-1946. ‡t Retablo de Maese Pedro
670 __ LC in RLIN, May 6, 1992 ‡b (hdg.: Falla, Manuel de, 1876-1946. Retablo de Maese Pedro)
Cite only the part pertaining to the heading in the 100 field of the authority record being established. The actual title portion heading in the LC record was:

‡t Pièces, ‡m organ ‡n (1862). ‡p Grande pièce symphonique. ‡p Allegro non troppo e maestoso.

nr9138558

100 1_ Franck, César, ‡d 1822-1890. ‡t Pièces, ‡m organ ‡n (1862). ‡p Grande pièce symphonique

The LC record has a typographical error. The heading was: Galpin, Francis Williams, 1858-1945. Errors such as this should be cited in the correct form, and notification of the error should be sent to LC.

nr9215778

100 1_ Galpin, Francis W. ‡q (Francis William), ‡d 1858-1945
670 __ LC in RLIN, May 4, 1992 ‡b (hdg.: Galpin, Francis William, 1858-1945; usage: Francis W. Galpin)

Citing UK MARC records:
The date of birth was found in a UKM record. It could not be verified elsewhere and was needed to resolve a conflict.

From Richard Hunter at LC: "I have recorded two decisions from Desc Pol (1987 and 1988): one to the effect that UKM records should be treated like member contributed records in OCLC, the other to the effect that there was no problem with citing a specific heading in the "Serial Record way (see example at the bottom of DCM Z1, p. 29), which would end up with a citation like "UK MARC x x x x x x." While the variation you ask about is a variation, I do not see a problem with it. Of course it could also be cited as "OCLC (followed by date)."

Citing dates from an order slip:
MCD 22.17: When an item being cataloged is accompanied by a dealer's order slip that gives a date for the composer, and the date does not appear in the item itself and has not otherwise come to light, record the date in the composer's name authority record in the 670 "Sources found" field for the item being cataloged, giving "Harrassowitz slip." [Blackwell slip, etc.] as the location. Do not include in the heading for a composer a date whose only source is a dealer's slip, unless the date is needed to resolve a conflict and an unsuccessful attempt has been made to find confirmation of the date in reference sources.

"The new Z1 deliberately does not mention the use of GMDs as LC was asked to discontinue this practice ... LC does not require catalogers to include the GMD nor has it made any restrictions on [its] use."

NMP encourages the use of the GMD. If you choose to use it, include the GMD in abbreviated form: [SR]. Do not precede or follow it with any punctuation.

Use "label" at all times, even if the information appears on both sides of an LP or on each CD in a multi-disc set. For CDs, which have no label per se, consider the information appearing on the disc itself to be the "label."

The following examples illustrate how the NACO Music Project has interpreted LC's guidelines in the past. Harry Price has said, "As long as it's clear where the information comes from, specific wording doesn't need to be prescribed." Options for citing locations other than the sound disc itself are "notes," "container," "container notes," "liner notes," "insert," and "program." None are prescribed.

Use "container notes" for information taken from program notes printed on the container:

precede or follow it with any punctuation.

Multi-volume items

Cite the volume and the location within that volume:

Citing information found in the reference source

There is no prescribed manner of citing information. For consistency's sake, NMP encourages the following.

Transcribe name and/or title information as it appears in the reference source. Date, place and other data can be
translated, summarized, and abbreviated. Using semi-colons to separate the elements of name, date/place, and
other information, follow this standard form: (Lastname, Firstname; born date, place, died date, place; other data)

Cite dates in full: February 2, 1997.
670 __ MGG ‡b (Lemlin, (Lemblin, Lemlein), Lorenz; b. probably around 1495, Eichstätt, date and place of death not established)

670 __ New Grove ‡b (Lemlin (Lemblin, Lemlein), Lorenz; b. ca. 1495, Eichstätt, d. after 1549)

The multiple biographical sources were included to demonstrate the uncertainty of the year of her birth. In each citation, the name is cited in full even though the name may have been cited in that form in a previous citation.

Transcribe both non-Gregorian or old style/new style dates when they both appear in the source. Except for names and titles, generally translate data in foreign languages into English, paraphrasing or summarizing where possible:

Citing information from bibliographic records

names | title information | bracketed information in the bibliographic record

Names

With headings for editors or arrangers of scores, NMP now has the option of indicating function (editor, arranger, etc.) of the person in subfield b of 670.

The title page has "Herausgegeben von Leo Kappel." An option would have been to cite the name this way: (Leo Kappel; editor)

Even though the name appears on the title page as "Pia und Pino Mlakar" and on the spine as "P. und P. Mlakar," record only the name being established:

If the name cited is not in the nominative case, do not amplify the citation to "explain" this, though ellipses may be used to show that surrounding words have been omitted. They indicate that words preceding the name cause the name not to be in the nominative. The title page has "sostavlanie i pedagogicheskaia redaktsiia Bronislavy Rozengauz."

A person's name used in the title of a book is considered to be usage and does not need to be repeated in subfield b if it is the only significant usage in the item.

When a person's name is used in the title of a book and is considered usage, repeat it in subfield b when subfield b is needed to record additional information:

Consider a person's name used in the title of a sound recording to be usage and do not repeat it in subfield b unless recording other information.

When a person's name is used in the title of a sound recording and is considered usage, it should be repeated in subfield b only when subfield b is being used to record additional information:

For headings for performers on sound recordings, indicate the instrument, vocal range, etc. in subfield b. LC has said that including information such as this is optional; NMP encourages such additions.

LC suggests the latter option when it is obvious the person is singing. At Indiana, the designation "singer" is used only when neither the voice range nor the role is known.

Title information

The first 670 field is always for the item in hand. For titles, include only one 670 field, for the item in hand, unless information from another source provides helpful information not found on the item in hand. If the form used in the 1XX field is not generated from or does not appear on the item cited in the first 670, include a second 670 field citing the source for the form of title used in the heading. If references are generated from other forms found on the item in hand, include that information in the 670. When references are taken from other items or reference sources, do not cite the sources from which the references are taken, unless the sources provide helpful information not found on the item in hand. Additional 670 fields for reference sources considered necessary to clarify the title may also be added.

The title cited in subfield a of the 670 is not repeated in subfield b because no additional information or other forms of the title to justify the chosen uniform title were found on the item. The second 670 was added since the uniform title was not established from the item in hand.

This is an exception to the practice of not repeating the title proper unless recording other forms of the title. Normally, the subtitle information would not be required in this 670, and so there would be no subfield b at all. However, the references from Petites pièces and Piccoli pezzi need the opus number in order to distinguish them from his Petites pièces and Piccoli pezzi op. 3. The subtitle was given in the 670 in order to identify this set as op. 11:

Citing a location within a web site: Grove music online | academic sites | commercial sites | online journals and periodicals | other examples

Citing information found: citing variant forms | citing pages in parallel language versions | other examples

Citing a web site by name

Generally, cite web pages by giving the name of the page and the date it was consulted. The date is important, since web page contents can change from day to day. When citing the URL, follow the instructions given in the LC Descriptive Cataloging Manual (DCM) Section Z1, explained below.

The following construction is generally used to cite web pages:

```
__________ WWW site, [date of search] ‡b [(data)]
```

Note: It is not necessary to include the word "accessed" or the phrase "viewed on" before the date of search.

If the information is found on a subpage, cite the location:

```
__________ WWW site, [date of search] :‡b [location] [(data)]
```
Adding "WWW site" to a citation for a resource that has the word "online" in its title or is known to be available only on the Web is unnecessary. However, using "WWW site" (_____________ WWW site ...) is generally preferred to "WWW page," "home page," or "homepage." Examples using this form, reflecting past practice, appear in this document.

670 __ Grove music online, Feb. 22, 2008 ‡b (Vesenniy tsvetï; (Spring flowers), pf, 1947)

When adding information to an authority record that cites Grove music online (or any Internet source), either add a second 670 field:

n85367781
100 1_ Dolukhanova, Zara, ‡d 1918-2007

or add to the existing 670 field, with the date of the most recent viewing of the source:

Grove music online ‡b (accessed Mar. 7, 2003: [info]; accessed Nov. 21, 2008: [additional info])

Grove music online includes the full text of The New Grove Dictionary of Music and Musicians, 2nd ed., The New Grove Dictionary of Opera, and The New Grove Dictionary of Jazz. To cite information found in entries marked with the word "opera" or "jazz", the following pattern may be used:

670 __ Grove music online, [date of search]: ‡b Opera ([data])

Wikipedia

Wikipedia is a source that is known to be available only on the Web, and thus using "WWW site" in a citation for it is unnecessary.

There is no consensus about citing books viewed via Google books. A conversation via the PCC list considered whether or not it was even necessary to indicate that the book was not in hand but was viewed online.

This format, citing Google books first and then the book, has been used:

### Capitalization of key, opus, and number

#### Key:

In German, D in Dur and M in Moll are capitalized. In major, the key is capitalized: D-Dur, but not in minor: a-Moll. In English, the key is capitalized, but not the mode: A major, D minor. In other languages, neither is capitalized: fa majeur, sol mineur.

Modifying machine-derived authority records (MDARs)

by Deta S. Davis, Library of Congress
Updated by Michelle Koth

When modifying machine-derived authority records (MDARs) treat them just like any other name authority record. Please observe the following points:

General

- If you have an item for the heading in hand, change the 008/33 (Auth status in OCLC) encoding from preliminary ("d") to full ("a"). This may be the only change to the record.
- Remove or correct machine-generated references as appropriate.
- Do not remove the 667 "Machine-derived authority record."
- "Do not routinely delete or change existing 670 fields..."--Z1, 670, p. 2, 2nd paragraph. If additional source information from the same bibliographic item needs to be added to the original 670 citation, give the source of the information at the end of the 670 and add the new information. Any 670 citation should be changed if it has an error or typo.
- Do not add additional 670s if they do not add any new information.

Incorrect headings and duplicate MDARs/NARs

- If an unmodified MDAR contains an erroneous heading, correct the heading and notify the LC NACO-Music liaison at nacomus@loc.gov [35]. Following the instructions above, include the LCCNs of all bibliographic records that need to be updated, including the LCCN of the bib record with the error, which is included in the 670 of the MDAR.
- If an MDAR duplicates a pre-existing NAR or another MDAR, follow the instructions for reporting duplicate authority records to LC.

Procedures for removing a person from an undifferentiated name heading

by A. Ralph Papakhian

You may alter the NAR for the undifferentiated heading as necessary. In some cases, you will be changing the undifferentiated heading into a "differentiated" one. In other cases, the heading will remain undifferentiated, but you will delete information relative to someone who is now differentiated. So, for example, if a heading represents four different people and you want to remove the violinist from among them (either by providing a date or by utilizing the ‡c qualifier for violinist), then simply delete the fields in the NAR related to the violinist. Delete any information
pertaining to the musician from the 675 note, if it is possible to determine which sources apply to the musician. If the heading represents only two people, and you are going to differentiate them, then you would delete the 670s from the existing heading and change the fixed field coding as necessary while also making the new NAR. In both situations, existing DLC/DLC bib records could be involved, so you must search for those and report them for BFM.

If a library is not yet independent, any change along the lines described above would be reported to the coordinator before contribution. Once independent, the library can make the necessary changes to the NARs and then report the change to LC at the following e-mail address: nacomus@loc.gov [35].

New procedure as of July 23, 2001 as per the revision of DCM Z1 (yellow pages):

When removing a name from an undifferentiated name record to create a new and unique record, include a 667 field saying "Formerly on undifferentiated name record:" and supply the LCCN of the record from which it was removed.

New procedures as of January 7, 2014 as per the revision of DCM 008/32 Undifferentiated personal name [36]:

- Do not use code "b" (for undifferentiated) in an RDA name authority record; all personal name authority records coded RDA should be differentiated.
- Do not add a new identity to an existing personal name authority record coded 008/32 "b"

- When information is found to distinguish a person included in an existing undifferentiated name record:
  - Create a new name authority record for that person, with distinguishing information
  - Transfer information pertaining to that person from the undifferentiated name record and edit as necessary.
  - If more than one identity remains in the undifferentiated NAR, and there is not sufficient information in the NAR to create new NARs for each name, leave the NAR coded AACR2.

- In order to facilitate machine processing of authority records (e.g., matching, linking), **when only one identity is left** on an undifferentiated personal name authority record (i.e., other identities are being disambiguated and removed), take the following steps:
  - Assure that the undifferentiated NAR only contains information relevant to the single identity remaining (e.g., 670s)
  - Add a 667 field to the undifferentiated NAR saying "Last identity on undifferentiated record; reported for deletion."
  - Report the undifferentiated NAR for deletion to naco@loc.gov [37]; LC will create a new replacement NAR and delete the old record.

To facilitate searching LCCNs in 667 fields in OCLC, format the LCCN following these guidelines from OCLC:

- Include the prefix (1 or 2 characters), the year portion (2 or 4 digits), and control number, with no hyphen.
- Add spaces following the prefix and preceding the year as explained here:

Procedures for adding a death date to a heading with an open date

Basic instructions

These instructions derived from the LC guidelines Addition of dates to existing personal name headings [38], LC responses to questions raised by NMP members, and examination of LC practice in the lists of changed headings [39] reported on the OCLC site.

1. The optional addition of death dates applies to established headings that contain birth dates only. (LCRI 22.17 allows for the addition of dates to an existing heading without dates if that heading is being revised for another reason.)

   Copland, Aaron, ‡d 1900- to Copland, Aaron, ‡d 1900-1990
   Burleigh, Cecil, ‡d b. 1885 to Burleigh, Cecil, ‡d 1885-1980

2. Dates (either birth or death dates) should not be added to a personal name heading in an existing authority record that currently does not have dates, except in cases of conflict or when revising the heading for another reason (LCRI 22.17).

3. When making a change to a date in a 1XX all references must reflect the change and all related NARs must also be changed, e.g., name/title NARs, musical groups for which the personal name heading is is a see also reference:

   Pasquier, Pierre, ‡d 1902- to Pasquier, Pierre, ‡d 1902-1986
   The heading for Pasquier is a see also reference (5XX) in the authority record for Trio Pasquier; the death date should also be added to the see also reference in that authority record.

5. When making a change to a date in a 1XX in an MDAR or AACR2-compatible heading, the name portion of the heading should be evaluated for correct RDA form and changed if incorrect.

6. When making a change to a date in a 1XX in a name/title NAR or MDAR, the title portion of the heading should be evaluated for accuracy and changed if incorrect:

   Koetsier, Jan, ‡d 1911- ‡t Quintets, ‡m trumpets, horn, trombone, tuba to
   Koetsier, Jan, ‡d 1911-2006. ‡t Quintets, ‡m trumpets, horn, trombone, tuba, ‡n op. 65
   When reporting changes for the Music Cataloging Bulletin (MCB), report only name/title headings in which the title portion of the heading has been changed along with the name portion of the heading.

References

In a message to the PCC list [40], Antony Franks sent a reminder that all cross references must be reviewed for compliance with AACR2 26.1J when revising an established heading, even if only adding the death date.

Exception: A death date is not added to a linking reference (a pre-RDA form of a heading coded as ‡w nnaa) Do not add the former heading as a 400 reference coded with subfield ‡w nne when the only difference is the addition of the death date. Reporting changes
NMP members who are not yet independent should report changed headings to their reviewers before contribution. Report changes to LC for BFM when appropriate. Report all changes for the Music Cataloging Bulletin (MCB).

Other changes that may be made to headings when adding death dates

Changes that reflect new practices:
For example, the 2001 Amendment to AACR2 provided for omitting British terms of honor (“Sir,” “Dame,” “Lord,” "Lady") in new headings. These terms are removed when updating the heading for another reason, such as adding a death date:
Solti, Georg, ‡c Sir, ‡d 1912- to Solti, Georg, ‡d 1912-1997

Updating a heading already coded AACR2 (rules c)
Do not add the former heading as a 400 reference coded with subfield ‡w nne when the only difference is the addition of the death date.

Updating a heading that is AACR2 compatible (rules d)
It is LC policy to fully upgrade an AACR2-compatible heading to the AACR2 form when revising the heading for any reason, including when adding a death date. Generally the AACR2-compatible form will include a middle name and the revised form will either omit the middle name or include the middle initial with a ‡q qualifier, depending on predominant usage.

Azpiazu Iriarte, José de, ‡d 1912- to Azpiazu, José de, ‡d 1912-1986

The difference between an AACR2-compatible and the revised form may be as minor as the addition or removal of a hyphen in the person's given name.

Note: LC applies this guideline inconsistently. In an e-mail dialog on NMP-L in January 2009, Joe Bartl of LC said, "Because of automated matching processes (real and imagined) and because of the potential for complications down the line (real and easily imagined for a name like "John Williams") it would seem the path of least resistance to retain the Mar. 13 in the heading." In response to NMP members' question about this, Ana Cristán said, "To the question "what is the official LC policy" ... , the fact is that there is no LC/PCC policy. That being the case, the answer is that LC relies on cataloger's judgment to determine the best option. As Joe Bartl opined, the path of least resistance would be to simply add the death date and move on; however, some cataloger's will disagree, etc. and each is correct to do as his/her judgment dictates."

NMP BFM requests and queries

NMP participants occasionally make changes to existing headings in authority records. When these headings are represented in the Library of Congress catalog, LC should be notified in certain cases so that bibliographic file maintenance (BFM) can be done. Previously, all heading changes had to be reported. Because of new software that will inform LC when a 1XX field in an authority record has changed, it is no longer necessary to report "straightforward changes to 1XX headings," (which includes name/title heading changes).

Because the new software doesn't handle newly created authority records, it is still necessary to report the following changes:
° a new heading and authority record for a person removed an undifferentiated authority record
° a new authority record for a heading in the LC bibliographic file but not in the authority file, in which the heading in the new record differs from the form in the LC bibliographic file.

These types of changes and queries should be sent directly to the following e-mail address: nacomus@loc.gov [35]. This e-mail account was established specifically to handle this correspondence. Responsibility for responding to BFM requests and queries will rotate monthly among senior music catalogers at LC.

A list of the types of BFM that LC still needs to have us report is on the PCC website:
http://www.loc.gov/aba/pcc/naco/bfmguide.html [41]

Please send notification of all changed headings to the Editor [42] of the Music Cataloging Bulletin.

Reporting duplicate authority records to LC

Multiple authority records that improperly represent the same person or work should be reported to LC. These may be records with duplicate headings or records with different headings that nonetheless identify the same person and that do not represent situations where "multiple bibliographic identities" are warranted.

A decision as to which authority record to retain and which to cancel should be made by the NMP participant. Unless there are other factors involved, the decision will generally be accepted by LC. Generally:

- Prefer to keep a heading that has been coded for RDA over one coded AACR2 or coded for earlier rules.
- If both NARs are coded for AACR2 or RDA, prefer the heading that contains more information (e.g., dates,
fuller form of name).

- If both headings are identical, prefer the one with the more complete set of information citations (670s) and references, 046 or 37X fields.
- If all things are equal, pick either one. Do not agonize over the choice!

Transfer as much relevant and useful data, including varying forms of headings (references), from the record to be deleted to the record to be retained as the OCLC validation software will allow and then replace the record. (Only LC can add the LCCN of the record to be deleted to the 010 field of the record to be retained.)

Once you have replaced the authority record that is to be retained, do not report the duplicate record until the following work day, as the revised version of the record will not arrive at LC until then. This will ensure that when LC adds the cancelled LCCN to the record or makes any other changes, they will be working with the revised record and your changes will not be overlaid.

The validation software does not allow replacing a name record containing a 4XX field that normalizes to a form matching a 1XX in another authority record. If the 1XX in the record to be deleted would be a legitimate reference in the record to be retained, do not add it. Make all changes that can be done, replace the record to be retained, and wait one working day to notify LC. Then, when reporting the duplicate LCCN, request that the the 1XX in the duplicate record be added as a 4XX to the surviving record.

When reporting a duplicate record, the following information should be sent to the LC NACO-Music liaison (nacomus@loc.gov [35]):

- The LCCN of the authority record to be cancelled and the LCCN of the record to which the cancelled LCCN is to be added.
  - Send LCCNs, not OCLC authority record numbers (ARNs).
    The LCCN is in the 010 field and is preceded by a prefix n, nb, no, or nr, which must be included when you report the LCCNs.
    The ARN appears at the top left of the OCLC authority record following the acronym ARN and has no prefix. LC catalogers cannot use the ARN when searching for authority records in their online catalog.
  - Example:
    Please delete n 84107906 in favor of no2002112706
    not
    Please delete ARN 1163881 in favor of ARN 5931714
  - When you have replaced the authority record that is to be retained, wait at least one working day before you report it to LC. If not, your changes may be overlaid when LC adds the cancelled LCCN to the record.
- If the headings in the authority records differed, send a list of LCCNs for bibliographic records to be updated.
  - Send LCCNs, not OCLC record numbers.
    The LCCN is in the 010 field.
    The OCLC record number appears at the top left of the bibliographic record.
  - Example:
    BFM needed for LCCNs 2006653168, 2002557697, 2005650856
    not
    BFM needed for OCLC #76899635, #49741303, #8583354

**Reporting heading changes for inclusion in the *Music Cataloging Bulletin* (MCB) to the Editor**

Report all changes to 1XX fields music-related authority records to the MCB Editor [43].

Include the following information:
- the old form of the heading
- the new form of the heading
- the LCCN (not the OCLC ARN) (See the instructions above)
Remove delimiters and subfields.

If there are diacritics in the heading that have been removed, indicate so:

The name of the diacritic follows the letter to which it applies:
Donizetti, Gaetano, 1797-1848. Crépuscule

Donizetti, Gaetano, 1797-1848. Nuits d’eacute;teacute; agrave; Pausilippe. Créacute;puscule

Studio for New Music (Moscow, Russia)

Studia novoi muzyki (Moscow, Russia) (diacritics omitted)

When a heading with diacritics is pasted from OCLC or a Word document into an e-mail message, the result can be indecipherable:

Vostr?a´k, Zbyne?k, Ena†chescu, Voicu

Eben, Petr. PilsnesíŒ z TelíŒsiŒlíŒnskaÀ

If it could be unclear how a record has been changed, indicate the change:

Say Hi (Musical group) (no2008050345) (removed extra space preceding qualifier)

When reporting the addition of a death date, cite the previous form and the new form:

Albert, Stephen, 1941- to Albert, Stephen, 1941-1992 (n 86143547)

If only the name portion of a composer's heading has been changed, it is not necessary to report the associated name/title heading changes or other associated NARs. Even though this name appears as a see also reference for Trio Pasquier (n 82217167), and the see also reference has had the death date added, report only the name record and not the associated record for the MCB.

Pasquier, Pierre, 1902- to Pasquier, Pierre, 1902-1986 (no 92024918)

When reporting changes for the MCB, report only name/title headings in which the title portion of the heading has been changed along with the name portion of the heading.

Definitions

AACR2-compatible: Denotes the coding on a name authority record (NAR) that was in the database before AACR2 rules came into effect, but was judged to be similar enough to accept in the online catalog without being converted to AACR2 rules. Fixed field: Rules (008/10) code is d.

Conflict: A condition in which certain variant access points match an authorized access point, jeopardizing its uniqueness within the database. Conflicts are to be avoided or resolved wherever possible.

Justification: The practice of giving a citation in the 670 field in an authority record for the forms of a name used as the authorized access point and for variant access points.

Non-unique name: A NAR with a 1XX heading that represents more than one person with the same name because there is insufficient information to make a unique AR for each. Also referred to as a consolidated AR. Synonymous with Undifferentiated personal name. Fixed field: Name (008/32) codes are a (unique) or b (non-unique)

Normalization: The automated process by which access points are compared for uniqueness to prevent duplicate access points and conflicts between records. Under the rules of normalization, all diacritics and punctuation marks (except for the first comma) are removed, all letters are converted to uppercase, and modified letters are converted to their unmodified forms. Subfield delimiters (but not subfield codes) are retained. Access points that differ only in diacritics, marks of punctuation (except the first comma), or special characters normalize to the same form and are thus considered in conflict. Such access points need to be further differentiated.

Preliminary records: Authority records created without an item in-hand, usually created as part of a retrospective conversion project. Fixed field: Auth status (008/33) code is d.

Provisional records: Authority records created when there is not enough information to establish a full record (for example, the cataloger does not have the language expertise to establish the record in full or a subordinate body name is available only in a language that is different from the language of the parent body). Fixed field: Auth status (008/33) code is c.

Qualifier: An addition to an access point or variant access point to further clarify its identify or to make it unique in the database.

Usage: The form of name usually found in a statement of responsibility in the item-at-hand. Variant usages may also appear in other parts of the item, such as in the title proper or in a quoted note.

Variant: A form of the name not chosen as the authorized access point; generally appears in the AR as a variant access point.

References

References are added to the authority record, including tags, subfields, delimiters, and diacritics formulated according to RDA.

See references (4XX field)

4XXs should be justified by citation in the 670 field or as required by RDA.

Search all cross-references to insure they do not conflict with authorized access points (1XXs). Do not include a 4XX see reference that would normalize to the same form as the 1XX or 5XX in another authority record. 4XX references may conflict with 4XX in other records [except for name/title headings].

Includes a reference from each variant that affects the primary elements of the name. Generally, this means variations in all elements to the left of the comma and in the first element to the right of the comma.

Generally:
• make one reference from each possible entry element of the name chosen as the heading.
• make only one reference from each variant. Do not trace a reference that would normalize to the same form as
the heading on the same record or to the same form as the heading on another record.

See also references (5XX field)

Make a see also reference when:
- a contemporary author uses one or more pseudonyms. Create name authority records for each name and link them with 500 see also references.
- the name of a performing or artistic group contains the name of one or more of its members. Make a see also reference from the heading for each person to the heading for the group and from that group heading to the heading for each individual.

5XX see also references will normalize to the same form as the established heading in another authority record.

Sources found (670 field)

A 670 is required to justify all elements of a authorized access point and variant access points. The first 670 in the record is normally for the work being cataloged.

It is not necessary to add 670 fields to justify references in the following cases:
- References justified by rules or rule interpretations only, usually because the reference is derived from inverting, shortening, etc., the heading or giving a substitute form in the heading.
- References made on the basis of the cataloger's awareness of different romanizations or orthographies.
- Name/title cross references derived from the work being cataloged, from other works cataloged under the same heading, or from information in standard reference sources.

Elements of the 670 field:

‡a

- main entry of the work being cataloged (not required by PCC)
- title proper of the work being cataloged
  - It is only necessary to cite the title proper; in most cases, other title information need not be given.
  - If the title is relatively brief, cite it in full. If the title is long, shorten it by abbreviating words or by using the 3 dot mark of omission after the first four or five words.
- date of publication or edition of the work
  - The date in the authority record does not include brackets even when they are used on the bibliographic record.
  - The following should also be included when citing the date:
    - symbols used, including the copyright "c" or phonogram copyright "p," question marks, and hyphens
    - multiple dates, if the bibliographic record has them

‡b

- the specific location(s) of the information found when the work cited is other than a reference source
  - examples: title page, jacket, cover, label, colophon, page 3 of cover, back cover, label, container
  - the information found (enclosed in parentheses)
  - necessary only when information is being provided in support of the formulation and/or identification of the 1XX, 4XX and sometimes the 5XX fields.

‡b immediately follows the date in ‡a

Sources not found (675 field)

The 675 field a reasonable source where information about where the heading is not found. It is not necessary to include in the 675 for every reference source consulted or in every authority record.
Nonpublic general note (667 field)

The 667 field is used to give:
• information of permanent value and general interest to catalogers
• instructions on the subject usage of the heading

Complex see also reference–name (663 field)

The 663 field is used to give:
• See also references prepared by the cataloger when the reference is more complex than can be conveyed solely through the contents of one or more 5XX fields
