

Browsing the Collection

It is easy to see a list of every item in the Yale Library collection.

In [Catalog](#) [1] simply click on the search button, with no search terms. There are millions of items, so you'll probably want to limit to some smaller set. Use the facets on the left to select sets of books you are interested in. For example,

- Select a language facet to see all the English books, Chinese books, etc. or
- Select a location facet to see books in a particular library, for example Sterling Memorial Library or
- Select a subject or call number facet to see all the books in a topic.
- Combine these facets to narrow results to a smaller set.
