

Video Cataloging (RDA): Variable fields: Identifiers (022-028)

Recording Identifiers for the Manifestation

[RDA 2.15](#) [1]

RDA Core

Source: Any source.

MARC 020 - 024 - 028

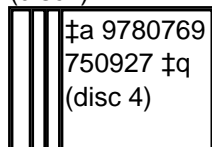

A single resource may carry several different identifiers. When more than one identifier is present on the resource, only one is core (preferably an internationally recognized identifier).

Best Practice Recommendation: Record identifiers (especially ISBN and publisher numbers), with qualifying information (when applicable) when present.

ISBN

[RDA 2.15.1.4](#) [2]

The ISBN is a 10- or 13-digit number recorded in the [MARC 020 field](#) [3], \$a, with both indicators blank. Do not include hyphens or the "ISBN" preceding the number. Qualifying information is recorded in \$q ((e.g. (set) or (disc#)).

Other Standard Identifier

[RDA 2.15.1.4](#) [2]

Universal Product Code (UPC) (MARC 024 1_). These numbers are generally found beneath a barcode on the container. The UPC is a 12-digit number (including the smaller ones before and after the main sequence), recorded in [MARC field 024](#) [4] with first indicator 1. There may be additional numbers to the right of the barcode; these should be recorded in \$d.

International Article Number (EAN) (MARC 024 3_). The EAN is a 13-digit number recorded in [MARC field 024](#) [4] with first indicator 3. The EAN can be differentiated from the ISBN-13 by its initial digits--the ISBN-13 begins with digits 978, or 9791 through 9799.

Source Specified in Subfield 2 (MARC 024 7_). Standard numbers from other schemes are recorded in [MARC field 024](#) [4] with first indicator 7 (e.g. DOI (Digital Object Identifier)). The source of the number is given in \$2. A list of standard identifier source codes can be found in [Source Codes for Vocabularies, Rules, and Schemes](#). "[Standard Identifier Source Codes](#) [5]."

Publisher Number (MARC 028 40). The Publisher Number is recorded in [MARC field 028](#) [6], \$a. The first indicator is coded 4 for video recordings. The second indicator is 0 (No note, no access point). Record the number as it is presented on the resource, including spaces, hyphens, capitalization, etc. The name of the publisher is given in \$b. Qualifying information is recorded in \$q.
