## Example: Preservation Microfilm

The preservation master MFHD.

YUL policy is to suppress the MFHD of the preservation master.

The screenshot shows the Voyager Cataloging interface. The title bar indicates the record is for 'Biches [microform] / Marie Laurencin, Jean Cocteau, Darius Milhaud, Francis Poulenc.'. The main window displays a MARC record with a hierarchy display. The hierarchy table is as follows:

Tag	I1	I2	Subfield Data
014	1		‡a 6724300
014	1		‡a 6724318
014	1		‡a 6724347
014	1		‡a 6724439
014	1		‡a 6724453
014	1		‡a 6724601
014	1		‡a 6724615
014	1		‡a 6724623
→ 852	8	0	‡b smlpres ‡k Suppressed ‡h Film ‡i PM040210 ‡x First generation (master) ‡x 12558759 (Iron Mtn.) ‡z Filmed with 8 other titles

### Hierarchy display

The hierarchy display can be expanded to show the titles linked to each of the MFHDs. Here the service copy bound-with list has been exploded. (Click on the + or - at each level to expand or compress the hierarchy display) Scrolling down further would allow us to explode the negative master bound-with list, and so on.

### Get Holdings command

When the Get Holdings command is used from the bibliographic record of the guest, a **Select or add holdings records** dialog window pointing to the 3 MFHD IDs of the host record will display. If the guest had preexisting MFHDs, these would be suppressed but displayed also in the dialog box, so the **Select or add holdings records** dialog box could display 3 locations representing the host record and 3 suppressed locations representing the guest. In this example, the guest MFHDs were never created.

**Select or add holdings records**
