Databases

Browse by title:

0-9 A B C D E F G H I J K L M N O P Q R S T U V W X Y Z

Use the database list to find:

- Journal and e-book collections
- Primary sources such as archives and personal papers
- Government documents and statistics
- Image, sound, and video collections
- Abstracts and indexing services

Search Tips:

- Try searching by broad subjects (for example, politics, music, engineering) or types of documents (news, archives, etc.).
- Refine your search by format, language, date of publication, date of acquisition, subjects, or call number.
- If you are looking for a specific journal, try the [eJournal](#) page or [Catalog](#)
- If you are looking for specific articles, try [Articles+](#)

The catalog records that make up this list are a subset of the Catalog, so all of the resources that appear here are also discoverable through more general searches in Catalog.

From the Database List, you can search multiple ways:

- Browse for a known title by clicking on a letter of the alphabet
- Search for a keyword, title, or subject using the search box

The hundreds of databases the library subscribes to include collections of e-journals and e-books, primary sources, image, sound and video collections, and abstract and indexing services.

Robust cataloging makes it possible to search on both current and former titles. Within a list of search results, you may limit to a language, subject, LC Classification letter, or the first letter of the title.

Not finding what you need within the Database list? You can easily toggle over to Catalog and run a search across
