

## Find Databases

The Find Databases list, a list of database titles, is now part of Quicksearch, with the heading Databases: <http://search.library.yale.edu/databases> [1]

The screenshot shows the Yale University Library Quicksearch interface. At the top left is the Yale University Library logo. The main heading is 'Quicksearch' in a large, reddish-brown font. On the left side, there is a vertical navigation menu with options: 'Quicksearch', 'Books+', 'Databases' (which is highlighted with a grey arrow), 'Articles+', 'Digital Collections', and 'New Arrivals'. The main content area features a search bar labeled 'Search Databases' with a dropdown menu set to 'All Fields' and a search button. Below the search bar is a 'Browse by title:' section with a horizontal bar containing the letters '0-9 A B C D E F G H I J K L M N O P Q R S T U V W X Y Z'. Underneath this is the heading 'Databases' followed by the text 'Use the database list to find:' and a bulleted list of database types: 'Journal and e-book collections', 'Primary sources such as archives and personal papers', 'Government documents and statistics', 'Image, sound and video collections', and 'Abstracts and indexing services'. At the bottom of the screenshot, there are two lines of text: 'If you are looking for a specific journal, try the eJournal page or Books+' and 'If you are looking for specific articles, try Articles+'.

The catalog records that make up this list are a subset of Books+, so all of the resources that appear here are also discoverable through more general searches in Books+.

From the Database List, you can search multiple ways:

- Browse for a known title by clicking on a letter of the alphabet
- Search for a keyword, title, or subject using the search box

The hundreds of databases the library subscribes to include collections of e-journals and e-books, primary sources, image, sound and video collections, and abstract and indexing services.

Robust cataloging makes it possible to search on both current and former titles. Within a list of search results, you may limit to a language, subject, or LC Classification letter.

Not finding what you need within the Database list? You can easily toggle over to Books+ and run a search across the full catalog.
