

Intro to Git Workshop

October 25, 2016

Intro to Git

October 25 at 2:00pm-4:00pm in Bass Library, L06

Learn how to use Git at the DHLab's next Coffee and Code! During the workshop, DH Developer Douglas Duhaime will cover the fundamentals of Git — a free, open source version control system. Participants will learn how to create repositories and branches, manage pull requests, and commit changes.

Git provides a robust system for collaborating with team members and finding existing code that you might adopt and adapt for your own projects.

Space for the workshop is limited; to register, please visit the [YUL Instruction Calendar](#) [1]. Lab computers will be available for use, but participants are welcome to bring their own laptops.

Coffee and Code workshops are open to all Yale students, faculty, and staff!
