Introduction to Bookworm

August 18, 2016

Coffee and Code: Introduction to Bookworm

*August 18 from 2:00-3:30pm in Bass Library, L06*

Visualize word frequencies at the DHLab's Coffee and Code. During the workshop, participants learned how to deploy Bookworm, a tool for analyzing trends in word or phrase frequencies over a designated time span. Sample text files were provided, but participants were encouraged to bring their own data for discussion. No prior programming experience was required.

**Couldn't make it to the workshop?**

See our [GitHub](https://github.com) page for what we covered.

For the cloud-based version of Bookworm, visit [Culturomics](https://culturomics.org).

To see one deployment of Bookworm in action, check out the n-gram search on Yale's "Robots Reading Vogue" project site [here](https://robotsreadingvogue.org).
