Managing Digital Photographs Meet-Up

September 11, 2017

Managing Digital Photographs Meet-Up

September 11 at 3:00pm in the DHLab (SML 316)

Looking for ways to manage digital photographs with custom tags and notes on your computer? Join us on Monday for a discussion of popular tools that can help you collect, organize, annotate, and export your collections. Tools we will consider include: Tropy [1], Lightroom [2], Evernote [3], and Google Drive [4]. In this meet-up, DHLab staff will highlight key features of the platforms, offering tips for how they might best be leveraged for research.

All are welcome to attend. No previous experience with the platforms is required.
