On Numbers as System and Symbol [6] Almanacs, maps, musical scores, poems, puzzles, and other works from the Arts Library Special Collections employ both practical and theoretical approaches to numbers, from counting sheep (and even clouds) to exploring such concepts as time, distance, money, and magnitude. Other works examine the relationship between numbers and language or color. William H. Wright Special Collections Exhibition Area, Robert B. Haas Family Arts Library, 180 York Street, through Dec. 14.
